

MARTA ESPINOSA GARCÍA

Data Engineer

Madrid, Spain - martaespinosagarcia@gmail.com

[linkedin.com/in/martaespinosagarcia](https://www.linkedin.com/in/martaespinosagarcia)

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience designing and deploying cloud-based analytics solutions on Azure and Databricks. Skilled in **Python, PySpark, SQL**, and modern AI workflows including LLM-based applications, API development, and scalable data platforms. Strong cross-functional communicator with a scientific background in Biology and advanced training in Data Science and Data Engineering.

TECHNICAL SKILLS

- **Programming:** Python, PySpark, SQL.
- **Cloud & Big Data:** Azure Databricks, Azure Data Factory, Azure Data Lake, Synapse, Delta Lake, Blob storage.
- **AI & Analytics:** API, LLM integration, Prompt Engineering, RAG concepts, Vision parser.
- **Databases:** PostgreSQL, MongoDB, SQL Server, MySQL.
- **BI & Visualization:** Power BI (DAX, Power Query).
- **Data Engineering:** ETL/ELT pipeline design, data modeling (Medallion Architecture), data quality.

PROFESSIONAL EXPERIENCE

Data Engineer | BASF

May 2023 – Present | Madrid, Spain

Tech Stack: Python, PySpark, SQL, Azure Databricks, Azure Data Factory, Azure Data Lake, Power BI, Git, CI/CD

- Designed and deployed scalable data pipelines on Azure Databricks and Data Factory to ingest and transform enterprise data from multiple business domains.
- Implemented Delta Lake optimization and PySpark transformations, reducing processing times and improving downstream data availability.
- Built and maintained interactive Power BI dashboards tracking critical KPIs, adopted by cross-functional teams for monthly business reviews.
- Developed SQL-based data quality checks and validation frameworks, with system alerts, reducing data incidents.
- Contributed to AI-readiness initiatives by preparing structured datasets for predictive analytics and machine learning use cases.

Auditor, Consultant & Trainer | Grupo Tentamus España

Jan 2019 – Sep. 2022 | Madrid, Spain

Tech Stack: Excel (pivot tables, VLOOKUP, macros), data analysis, ISO standards

- Analyzed laboratory results, designing Excel-based dashboards to benchmark performance and identify compliance gaps.
- Conducted food safety and quality audits, delivering risk assessment reports with data-backed recommendations.
- Led training programs for 200+ professionals and communicated technical findings to non-technical stakeholders.

Operations & Analytics Project Manager | Seaside Sustainability

Apr 2021 – Aug 2021 | Massachusetts, USA (Remote)

Tech Stack: Google Analytics, Hootsuite, Wix, Adobe Premiere Pro, Canva, data reporting

- Led a cross-functional team of 8 interns, managing operations, analytics, and digital platform projects within the Marketing department.
- Analyzed website and social media KPIs using Google Analytics and Hootsuite, producing weekly data reports that informed content strategy.

Food Safety & Data Consultant | FACE – Spanish Federation of Celiac Associations

Oct 2016 – Jan 2019 | Madrid, Spain

Tech Stack: Database management, WordPress, Joomla, ELS platform, e-learning systems

- Managed and updated a certified gluten-free product database with 1,000+ entries, ensuring regulatory compliance and data integrity.
 - Administered the European License System (ELS) certification process, coordinating documentation across multiple stakeholders.
 - Authored scientific reports and technical content published across blogs, journals, and the organization's website
-

KEY PROJECTS & ACHIEVEMENTS

- **FOX (GenAI Finance Assistant)**: Is BASF's internal **AI-powered Finance & Controlling assistant**, acting like a digital coworker that answers business questions and surfaces insights from enterprise data. It uses the **Databricks Lakehouse platform**, governed data workflows, and **GenAI/LLM capabilities** to combine structured finance data with conversational AI for enterprise decision support.
 - **Galileo (Logistics Optimization Platform)**: Developed an end-to-end data pipeline centralizing logistics data from SharePoint with the Enterprise Data Lake in **Databricks, using Azure Data Factory, Azure Blob Storage, and Fast API**. Enabled route optimization and transport efficiency improvements across BASF's supply chain.
 - **PA Catalyst (Predictive Maintenance Analytics)**: Is an **analytics platform for catalyst performance monitoring**, using **Databricks medallion architecture** to cleanse and organize raw client data into trusted analytical datasets. It combines **Databricks, Delta Lake, forecasting models, and Power BI dashboards** to track catalyst efficiency across customers and predict the optimal replacement time before performance declines.
-

EDUCATION

Master's in Data & Cloud Engineering

MIOTI Tech & Business School | Mar 2024 – Jul 2024

Master's in Data Science & Big Data

MIOTI Tech & Business School | Jan 2023 – Jul 2023

Bachelor's Degree in Biology

Universidad Complutense de Madrid | 2007 – 2014

CERTIFICATIONS

- Databricks Certified Data Engineer Associate
 - Databricks Lakehouse Platform Fundamentals Accreditation (V2)
-
